Agentic AI Engineer with hands-on production experience designing multi-agent systems, RAG pipelines, and LLM-integrated automation workflows. Proficient in LangGraph, LangChain, MCP, ReAct reasoning patterns, and vector database retrieval. Currently engineering autonomous agent architectures at a Swiss AI firm; available for full-time roles.

EDUCATION

Manisa Celal Bayar University - Manisa, Türkiye
Bachelor of Science in Computer Engineering

Expected Graduation: June 2027

EXPERIENCE

Light Eagle AG - Remote, Switzerland
AI & Automation Engineer

July 2025 – Present

- Built a complete voice-agent pipeline end-to-end real-time speech transcription feeding a RAG retrieval-and-reasoning layer over internal knowledge shipped as a full-stack web application, owning the flow from audio capture through grounded, context-aware LLM responses.
- Architected a multi-agent orchestration system with LangGraph, implementing orchestrator-worker patterns to automate supplier-matching workflows across data ingestion, cleansing, and decision-making via n8n and Python.
- Engineered agentic tool-use integrations via the Model Context Protocol (MCP), grounding agents to internal REST APIs, databases, and external sources, and instrumented them with prompt tracing, token-usage monitoring, and error logging for reliable production operation.

İnci Holding - İzmir, Türkiye
Software Engineering Intern

July 2026 – August 2026

- Built and shipped Korrente's production marketing site a Vite + React 18 SPA with React Router and a hand-built, token-based design system using zero UI libraries, meeting WCAG AA accessibility standards.
- Engineered its client-side battery-storage revenue engine (grid-arbitrage and solar-plus-storage modes) a pure, unit-tested model with FCR/balancing stacking and chemistry presets that computes payback, ROI, LCOS, and NPV from Netherlands market data.

ENM Digital - Hybrid, Manisa, Türkiye
Software Engineering Intern

December 2024 – January 2025

- Engineered three client-facing web applications in React, Node.js, and TypeScript within a 2-month sprint cycle; implemented RESTful API integrations and collaborated with a cross-functional team to deliver production releases aligned with business requirements.

Paradise Point Summer Camp - Boise, Idaho, USA
Camp Counselor & Archery Instructor

June – October 2024

- Led daily camp operations and trained youth in archery; certified through Archery Education Resource.
- Enhanced leadership and multicultural communication skills in an international environment.

TECHNICAL SKILLS

- AI & Automation:** LangGraph, LangChain, n8n, RAG (Retrieval-Augmented Generation), Multi-Agent Orchestration, Agentic Reasoning (ReAct, CoT), MCP (Model Context Protocol), Vector Databases (Pinecone, Supabase), LLM Integration, ETL Pipelines, Prompt Engineering, Observability & Tracing, Claude Integrations
- Programming Languages:** Python, SQL, Java, JavaScript, TypeScript, HTML, CSS
- Tools & Technologies:** Git, GitHub, Docker, VS Code, Postman, LangSmith, Weights & Biases, Supabase, PostgreSQL, REST APIs, n8n
- Concepts:** Machine Learning, Agentic Systems, Object-Oriented Programming, Data Structures & Algorithms, RESTful APIs, Database Management
- Languages:** English: Fluent (Professional Working Proficiency), Turkish: Native

CERTIFICATIONS

- Artificial Intelligence Fundamentals IBM (2026)**
